

13th Annual workshop

Agnico Eagle – Eldorado Gold Québec Research Chair in Mineral Exploration

Friday, November 21, 2025

In person : [Registration required](#) or **Online:** [Teams](#)
Pavillon d’Optique Photonique, Room : COP-1168

Workshop schedule:

8h30-9h00:		Welcome
9h00-9h10:	<i>G. Beaudoin</i>	Overview of the Chair's program
9h10-9h30:	<i>R. Orloci-Goodison</i>	Geochemistry of Neoarchean mafic to intermediate volcanic rocks of the Hope Bay greenstone belt, Nunavut
9h30-9h50:	<i>D. Oswaldo Ruiz</i>	Timing and genetic controls of the orogenic gold deposits in the Hope Bay greenstone belt, Nunavut
9h50-10h10:	<i>A. Rodizes</i>	Targeting high-grade gold ore shoots within the orogenic gold systems of the Hope Bay greenstone belt
10h10-10h20:	<i>Break</i>	
10h20-10h40:	<i>V. Drouillot</i>	A successful story of failed geochemical vectoring – early alterations matter, a lesson from the Ormaque deposit
10h40-11h00:	<i>L. Alarcon</i>	Short-wave infrared (SWIR) signatures of hydrothermal alteration related to orogenic gold mineralization in the Val-d'Or area
11h00-11h20:	<i>H. Hasanzadehshooili</i>	Progress on coupled multi-phase geomechanical modeling using MOOSE: from verification to regional-scale meshing of the Bourlamaque domain
11h20-11h40:	<i>M. Bertauts</i>	Deciphering gold precipitation history through pyrite NIR imaging and fluid inclusions: insight from the Triangle and Ormaque orogenic gold deposits
11h40-12h00:	<i>R. Rodrigues dos Santos</i>	U-Pb time constraints on gold mineralization events at the Augmitto-Bouzan deposit, Cadillac-Larder Lake dz, Abitibi
12h00-13h00:	<i>Lunch</i>	<i>(Registered participants only)</i>
13h00-13h20:	<i>A. Hamdy</i>	Petrographic Insights into the Paragenesis of Orogenic Gold Veins, Meliadine Gold District, Nunavut
13h20-13h40:	<i>M. I. Hamadi</i>	Vectoring Gold Mineralization through Hydrothermal Alteration Minerals in the Meliadine District, Nunavut: Preliminary Field Observations
13h40-14h00:	<i>W. Lutfi</i>	Long-Distance Detection of Gold Deposits in Glaciated Terrains: Meadowbank, Nunavut
14h00-14h20:	<i>J. Biron</i>	Indicator Mineral Composition and Till Geochemistry at the Upper Beaver Deposit
14h20-14h30:	<i>Break</i>	
14h30-14h40:	<i>V. Casanova</i>	Sulfate minerals occurrences in orogenic gold systems: preliminary observations from the Val-d'Or camp
14h40-15h00:	<i>M. Roglic</i>	Trace element composition of arsenopyrite from orogenic gold deposits
15h00-15h20:	<i>A. Vanelinke</i>	Chalcopyrite Trace Element fingerprints in porphyry system deposits: A Tool for Ore Deposit Discrimination and Vectoring
15h20-15h40:	<i>Discussion</i>	
15h40-17h00:	<i>Networking cocktail</i>	<i>(Registered participants only)</i>
